

Thermoplastic Elastomer Wrapping Materials

TPE T55-OM Series: Thermoplastic Elastomer Wrapping Materials

TPE T55-OM series products have excellent compatibility with ABS, PBT, PET, PC, PC/ABS, PA, PP, PE, and PS. The products made of these materials have a soft haptic texture and low density, good resistance to high temperature and weather. TPE T55-OM series products have been widely applied in handles which have a requirement for soft haptic texture, such as the toothbrush, pen loop, handles of bags, tableware tool grips, bicycle grips, grips of exercise equipments, power tool handle, and handles wrapping around various tools and the daily commodities.

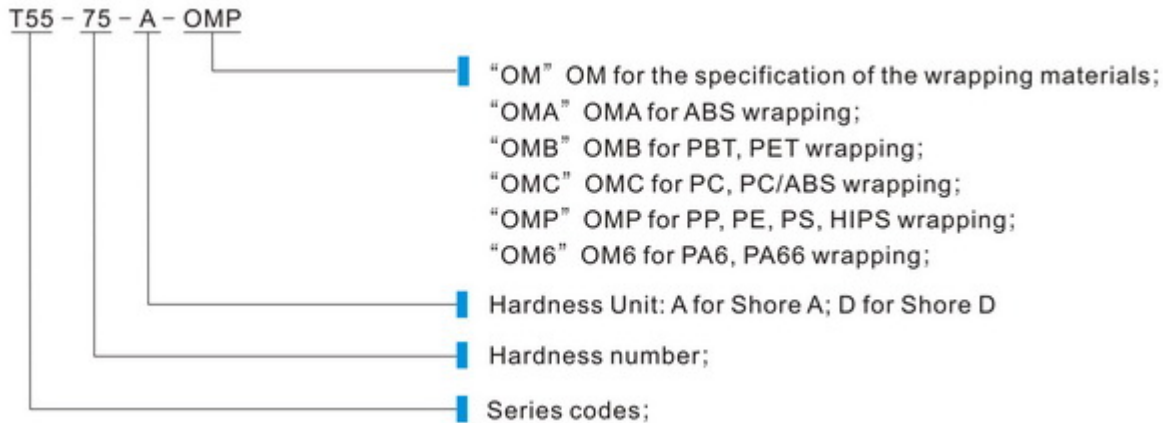

Table of TPE T55 Series Types & Specification

Products series	Type	Specification	Description
TPE	Wrapping grade	T55-OMA	Excellent adhesion with ABS
		T55-OMB	Excellent adhesion with PBT, PET
		T55-OMP	Excellent adhesion with PP, PE,PS, HIPS
		T55-OMC	Excellent adhesion with PC, PC/ABS
		T55-OM6	Excellent adhesion with PA6, PA66

Application: power tool handle, shell of cell phone, game remote controller, flashlight etc.
